

Focused Workshop Series

As part of the on-going involvement exercise on the future use of Torrington Community hospital, the Northern Devon Healthcare NHS Trust and the NEW Devon CCG are launching a series of workshops which will focus on explaining the key features of the project in detail.

Four key themes have been identified from the weekly drop in sessions as the most important topics for the Torrington Community and therefore the ones that most need exploring. These are: **Home-based Care, End of Life Care, Opportunities for the Hospital and Inpatient Beds.** We will be having one focused workshop for each of these themes.

Workshops will run from 12:00noon until 2:30pm. The first half of the session will be structured feedback from you. We will be asking you to think about the specific themes and to feedback in a structured way; we will have facilitators at each of the sessions to help with these group exercises. We will then provide soup and a roll for lunch, followed by a presentation and Q&A session from key people who work in the specific topic areas.

EVERYONE is WELCOME! We would encourage you to attend all of the sessions as there will be lots of information available as well as the feedback sessions. However, we do understand that people have other commitments which may not make this possible. Please do come to the ones you can. We would be grateful if you could let us know whether you are planning to attend for catering purpose.

Workshops will be taking place at Torrington Hospital on the dates below:
