The team

The Paediatric Bladder and Bowel Care Team comprises of a small team of nurses who provide a service within Devon, but are centrally based in Exeter.

The team is skilled in the assessment and management of children and young people with complex bladder and bowel care issues.

Following a referral into the service, your child will be offered:

- An appointment with one of the paediatric bladder and bowel care nurse specialists
- A detailed assessment of your child's bladder and bowel care needs. This may include an assessment of eligibility for continence products on prescription.
- Individualised advice and a programme to suit the specific needs of your child to help them achieve continence or develop a healthy bladder and bowel.
- Follow-up includes continual assessment of your child's needs, to ensure the programme is consistent and remains appropriate to the needs of your child and the prescribed continence products are fitting correctly.

What we expect from you

- For bladder and bowel diaries to be completed when requested prior to appointments. This information will aid the specialist nurse in the assessment of your child.
- For appointments to be attended on time. Clinic non-attendance may affect the delivery of continence products.
- For you to keep us updated of any changes to your contact details. For example, change of address, telephone number or change of GP.
- We ask that you treat our staff with respect, not verbally or physically aggressive towards them.

Paediatric policy on continence product provision

In line with most other NHS health providers, The Royal Devon University Healthcare NHS Foundation Trust may provide continence products on prescription from the age of 5 years old, for those children with a physical or learning disability that impacts directly on their ability to achieve continence over a 24 hour period.

The Paediatric Bladder and Bowel Care Service follows the Guidance for the provision of continence containment products to children and young people (2021) (Bladder and Bowel UK www.bbuk.org.uk).

- All children should have a documented assessment and a trial of toilet training undertaken, if appropriate, prior to the issue of any product.
- If full continence is not achievable, then healthy bladders and bowels should be promoted at all times.
- The child will be kept under review by the assessing nurse, with the provision of suitable containment products as provided by the contracted provider of continence products for The Royal Devon University Healthcare NHS Foundation Trust.
- Disposable pants are not prescribed.
- Products are not prescribed as containment for a treatable condition such as night time wetting or soiling in relation to constipation, or for children who do not sit on the toilet to have their bowels open.
- Products are not prescribed for use during menstruation
- Products are not prescribed for night time wetting once day time continence is managed without products.
- Products are not prescribed for an acute illness that results in a temporarily increase in the number of products required. Information will be given on where/how to access more.

PALS

The Patient Advice and Liaison Service (PALS) ensures that the NHS listens to patients, relatives, carers and friends, answers questions and resolves concerns as quickly as possible. If you have a query or concern call 01271 314090 or email ndht.pals@nhs.net. You can also visit the PALS and Information Centre in person at North Devon District Hospital, Barnstaple.

Have your say

Royal Devon University Healthcare NHS Foundation Trust aims to provide high quality services. However, please tell us when something could be improved. If you have a comment or compliment about a service or treatment, please raise your comments with a member of staff or the PALS team in the first instance.

'Care Opinion' comments forms are on all wards or online at www.careopinion.org.uk.
