The Friends and Family Test (FFT) score is calculated as outlined in the NHS England guidance.

The calculation is as follows:

'Would recommend' percentage is calculated as follows:

$$\frac{\text{Extremely likely} + \text{Likely}}{\text{Extremely likely} + \text{Likely} + \text{Neither likely nor unlikely} + \text{Unlikely} + \text{Extremely unlikely} + \text{Don't know}} \times 100$$

'Would not recommend' percentage is calculated as follows:

$$\frac{\text{Extremely unlikely} + \text{Unlikely}}{\text{Extremely likely} + \text{Likely} + \text{Neither likely nor unlikely} + \text{Unlikely} + \text{Extremely unlikely} + \text{Don't know}} \times 100$$

The Trust's target 'Would recommend' score is 75%
